

ELGIN & HALL®

BRITISH MADE

COMPLETE COLLECTION

HEATING HOMES FOR GENERATIONS

Welcome

An Elgin & Hall fireplace could easily be the most rewarding addition you make to your home and its value. Since the foundation of our parent company in 1964, we have successfully continued to grow from our base in the North East of England. Every design is lovingly created here in the UK.

Over 60 years of continuous innovation and development has provided us with a collection of fires and fireplaces to suit any interior and lifestyle, whilst always adhering to our founding principles of elegance and simplicity. This timeless quality means your chosen fireplace will always be comfortably in agreement with your tastes in furnishing and décor.

You can rest assured that our gas fires are engineered, produced and tested for peak performance and reliability.

Our surrounds are designed to keep up with changing lifestyles and include features which only we can produce thanks to our investment in the latest machinery.

At the same time, we depend on our craft skills to hand finish and polish each marble or timber piece to perfection. It is this balance of innovation and heritage that makes your Elgin & Hall fireplace uniquely special.

As part of the BeModern® Group we manufacture a range of product in house, to include, surrounds, fires and fireplaces in marble and timber, as well as steel and cast stoves. Our bathroom range suits both the traditional and contemporary home.

Understanding a fireplace

Motion Sense Lights

Undermantle LED down lights offer a warm glow to your surround and fire. Turn on by the simple motion of your hand.

Fire

The heart of the fireplace. Choose a Gas inset fires, to finish your fireplace. Electric is also a great choice, find your perfect PRYZM electric fire from pryzmfires.com

Back Panel

A flat surface that is located at the back of the fireplace and where the inset fire sits inside.

Choosing your fireplace

Micro Marble Surrounds

- Suitable for gas and electric inset fires
- Suitable for inset electric stoves*

Page 6

Micro Marble Inglenook

- Micro marble inglenook with marble or timber back panel
- Suitable for freestanding electric stoves
- Flat to wall fix
No chimney or flue needed
- Choice of electric stoves*

Page 22

Timber Inglenook

- Suitable for freestanding electric stoves with no back panel cut out or inset electric stove with a cut out
- Flat to wall fix - No chimney or flue needed
- Choice of electric stoves*

Page 26

*See pryzmfires.com for electric fires & stoves

Shelf / Mantel

The top of the fireplace. The best place to display your ornaments.

Leg / Surround

The uprights of a fireplace. Gives height and decoration to a fireplace. Our Surrounds are precision machined and assembled making sure you receive perfection.

Hearth

The base part of the fireplace. The hearth sits on the floor and the rest of the fireplace sits on top.

Our Commitment

Highest Standards of Quality BeModern® furniture suppliers manufacture a world class product and continuous investment means we are recognised as the industry leader:

- Operating to ISO 9001:2015 accreditation
- Working closely with our supply partners to maintain the highest quality of raw materials.
- Investing in new technologies to provide innovative solutions.

Our CSR Policies

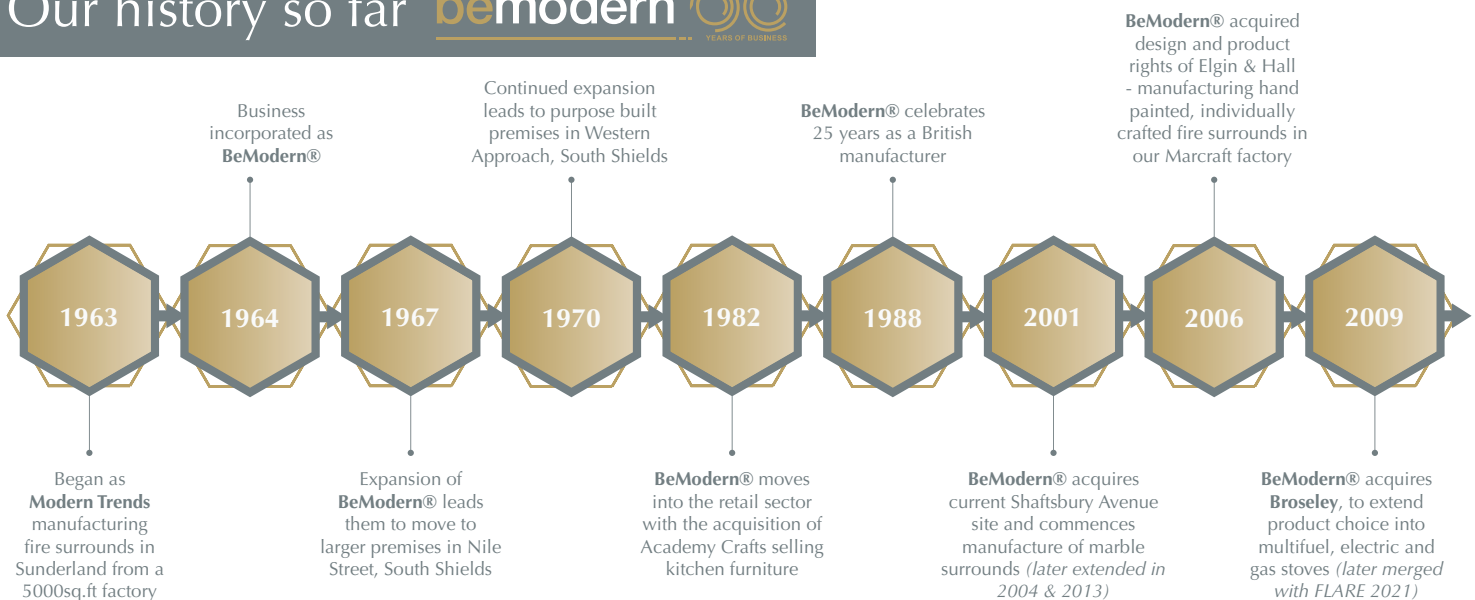

We are aware that global climate change threatens the wellbeing of the natural environment and society. Whilst governments around the world move to agree on cutting greenhouse emissions, as a British manufacturer BeModern® works to minimise our own carbon footprint, cut emissions, reduce waste, recycle and reap the benefits of new, green ways of running a manufacturing business.

Responsible Manufacturing

We are dedicated to minimising the environmental impacts of our manufacturing activities and seek to explore new ideas through eco innovation, for example our investment of over £1m in an eco-boiler to convert all waste timber into heat for our factories.

Our history so far **bemodern**® CELEBRATING 60 YEARS OF BUSINESS

Environmental Management

Having been accredited with ISO 14001:2015, the internationally recognised environmental management standard, BeModern® is committed to continually improving the effectiveness of our environmental management system.

Transport

BeModern® logistics department makes thousands of deliveries each year, providing us with an opportunity to reduce the carbon footprint through regularly modernising our fleet to minimise noise and air pollution and training drivers in fuel efficient, safe driving.

FSC® Certified Timber

BeModern® relies heavily on wood as a significant component in its wide range of products. With the ever-increasing demand for forestry products, the company takes a proactive stance in conservation. To fulfil its commitment to sustainable practices, BeModern® exclusively utilizes FSC® certified timber in the production of all its items.

Additionally, the company holds a complete Forest Stewardship Council® chain of custody certification, ensuring that its wood supply adheres to strict environmental standards throughout the supply chain.

Micro Marble Surrounds

WHAT IS MICRO MARBLE?

Micro marble is small pieces of real marble that has been crushed and compacted together and mixed with resin to ensure a smooth and even surface.

This is a beautiful material that we hand craft into a range of stylish and classic designs perfect for all tastes and homes.

Micro Marble Inglenook

The charm of micro marble is captivating in an Inglenook design; available in White, this surround can be beautifully paired with up to 6* optional back panels.

Choose from:

- White Marble
- Black Slate effect
- Metal Rock effect
- Chicago Concrete Herringbone
- Grey Slate effect
- Grey Herringbone

to create the perfect combination to compliment your interior whether contemporary or traditional.

Motion Sense under mantel lighting can be activated from a subtle hand movement across the surround to adorn the inglenook back panel with a warm glow.

Our micro marble inglenooks are suitable for electric stoves only; choose from our range of contemporary and traditional electric stoves and add a decorative flue for the look of a real woodburning stove.

Find your perfect electric stove at pryzmstoves.com

Timber Inglenook

These beautifully designed flat to wall fit inglenooks give the added depth of an inglenook without the need for any remedial work to the wall they are positioned against.

The Charlestown model is ideally designed to accommodate inset electric stoves, featuring a standard sized 16" cut-out back panel. On the other hand, the Amble model is perfectly tailored for freestanding electric stoves, featuring a convenient back panel notch, allowing for easy passage of cables and plugs.

Micro Marble Gas Fireplaces

Pre-Cast or Standard flue solutions

We have engineered a way to fit our highly desirable Elsie 950 gas fire into the standard 16 x 22" opening in a UK chimney breast or pre-cast flue, with no building work.

Our hotly anticipated Calleos 600CF, 750CF & 800CF gas fires have been perfectly paired with unique Elgin & Hall micro marble designs, this creating the ultimate complete gas fireplace. With its market leading dual gas burner, the Calleos puts Elgin & Hall a step ahead of the market. Indulge in the ultimate luxury and opt for the non-reflective glass which will amaze your viewing pleasure, creating the illusion of no glass, simply, crystal clear.

Inset Gas Fires

Once you've selected your new surround, you may choose to give it a warm glowing heart with an Elgin & Hall gas fire.

Our gas fires are controllable and convenient to operate with a discreet Smartslide control mounted on the top side or a manual control and igniter located behind the fret - flame height and heat output is at your control.

Installation

Current regulations stipulate that all gas fire installations must be carried out by a Registered Gas Safe Engineer.

For information and advice on a Gas Safe Engineer, please contact your local Elgin & Hall retailer.

Servicing

All gas fires need to be serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

This annual service is a condition of our 5 year limited warranty, and you must show record of approved servicing.

5 Warranty

We provide a 5 year Limited Warranty* so you can be confident you have purchased and installed a high quality product.

*Terms & conditions apply.

Safety Assurance

Flame Failure Device

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

Oxygen Depletion Sensor

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

Quality Approved

All our fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001:2015 and ISO 14001:2015 guaranteeing responsible working and product quality.

Accessories

Xtra Canopy

The Xtra canopy kit* "tunes" the appliance to your flue to raise the efficiency by up to 8% on an open fronted fire.

*Available on Slimline or Deepline Radiant models only

Spacer Kit*

The spacer kit fits to the rear of the fire to reduce the depth by 25mm. It is ideal for use with pre-cast flues.

*Not available on the Cast Stove Front fascia

Handle Options

An easy grip* attachment allows those with restricted movement to control the ignition & heat.

Matching colour handles are available in Brass & Chrome. A Black Smartslide handle is supplied as standard with Smartslide models.

*Easy grip handle not suitable for Calleos gas fire.

Super Controllable

Smartslide Control

All gas fires are available with a Smartslide Control feature to turn the fire on and regulate its flame level. Mounted on the side of the fire, the control provides convenience of operation.

Manual Control

If you prefer the traditional feel of a gas fire choose one of our open fronted models with manual controls. Concealed behind the fret of the fire, the controls are easy to access so you can regulate your desired flame setting and heat output then sit back and enjoy the new focus of your living room.

Choosing the right engine

Open Fronted

Slimline Radiant

Radiant gas fires pull in cold air through their open front, circulating it over the real flames and emitting it back into the room.

Flue Type	Conventional Class 1 & 2 + Pre-Cast			
Gas Type	Natural Gas			
Efficiency	52% (58% with Xtra canopy)			
Control	Smartslide or Manual

Cast Stove Front

The 16" Cast Stove Front inset gas fire, radiates the full experience of a real stove but with the convenience of being inset into an existing back panel. A heavy cast iron fascia finishes this model to give a room a true luxurious aesthetic. The glass fronted engine offers an array of highly realistic dancing flames, whilst providing instant heat and with the option for a slide or manual control.

Fascia	Width	Height	Depth
Exclusive	510mm	605mm	Inset Depth (See table)
Devotion	510mm	605mm	
Cast Stove Front	562mm	659mm	

— Exclusive Fascia Collection —

The framework of the Exclusive trim has a flat face with a long bevelled edge that slopes down towards the fire. The trim is broad and slightly accented in profile to complement the four boldly curving bands of the fret.

In Brushed Steel, Brass, Chrome or Black, the harmony of the trim and fret creates a modern but sympathetic note to a stylish interior.

Exclusive finishes:

Chrome

Brushed
Steel

Brass

Black

— Devotion Fascia Collection —

The distinguishing feature of this range of designs is the Black finished framework bordering either side of the metal trim. This serves to provide a dramatic contrast which accentuates the Chrome, Brass, Black Nickel or Brushed Steel finish.

The fret itself curves slightly outwards to add extra interest.

Devotion finishes:

Gas Stoves

From hand crafted ceramic fibre logs, the flame picture is remarkably reminiscent of a real woodburning stove.

Although the output is slightly less, the extra convenience of gas more than compensates.

Super Controllable

Remote Control

Effortless to operate, choose remote control* where available to easily change the heat.

*Only available on stated models

Manual Control

Our manual controls are easily accessible offering a convenient way to control the heat with in your room.

Installation

Current regulations stipulate that all gas stove installations must be carried out by a Registered Gas Safe Engineer. For information please contact your local Elgin & Hall retailer.

Servicing

All gas stoves need to be serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

Warranty

Gas stove appliances carry a 1 Year warranty which covers any manufacturing faults. It is important to note that a number of components in your stove are classed as consumable and therefore will need to be replaced from time to time. (Consumable parts include grates, firebricks and rope.)

Flame Failure Device

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

Oxygen Depletion Sensor

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

Quality Approved

All our fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001:2015 and ISO 14001:2015 guaranteeing responsible working and product quality.

Multifuel Stoves

Multifuel stoves hold energy efficiency class (EEC) ratings of A, making them top of their class when it comes to reducing your carbon footprint.

Aftercare

Regular servicing is essential to maintain the optimal performance of multifuel stoves. When cleaning the stove's surface, ensure it has cooled down completely and use a soft brush. For tougher stains, a slightly damp lint-free cloth can be employed, but make sure to dry the surfaces promptly. Additionally, annual chimney sweeping is crucial for both multifuel and woodburning stoves to ensure fire safety at home. Over time, the high-temperature paint on your stove may lighten naturally. In such cases, consult your stove retailer for recommended paint, replacement parts, and spares to restore or touch up your stove.

Icon Key

What is Ecodesign Ready?

Ecodesign Ready is the European-wide programme to lower emissions and came into force in the UK from 2022. Our stoves comply with the new Ecodesign Ready programme when used as woodburning. Look for our Ecodesign logo.

Ecodesign Ready multifuel stoves are designed to burn at higher levels in the fire box. This greatly reduces the organic particulates that are normally released from a pre Ecodesign Ready multifuel stove. This in turn significantly reduces the level of emissions from woodburning and has a positive impact on carbon reduction.

HETAS is a non profit organisation that approves biomass and solid fuel appliances. With HETAS approved stoves you can be assured that the appliance conforms to the UK building regulations in its use and installation. Our stoves are so efficient they bear the HETAS approval.

ActiView Technology enables our stoves to self clean the glass for longer periods. By utilizing hidden ducts and channels, three types of airflow enhance combustion and minimize glass deposits.

5 Warranty

We provide a 5 year Limited Warranty* It is important to note that a number of components in your stove are classed as consumable and therefore will need to be replaced from time to time. (Consumable parts include grates, firebricks and rope.)

Glass does not carry any form of warranty, this is because the glass can only break through mechanical impact. *Terms & conditions apply.

BeModern[®] | 19/34 Bedesway | Bede Industrial Estate | Jarrow | Tyne and Wear | NE32 3BE

BeModern[®] hold design copyright and registration of design for its product ranges. BeModern[®] are continually striving to improve and develop their range of products. It is important, therefore, to check details before ordering as sizes and specifications may change without prior notice. Whilst every effort is made to ensure accuracy and colour, it is not always possible to obtain perfect reproduction because of the materials and printing processes used and you may find that shades, natural grain markings and marble colouring are not consistent. © BeModern[®] Jan 2024
